PROACTIVE SERVER MONITORING

Server monitoring that identifies issues before they become problems.

We've developed a proactive server monitoring service that monitors the critical components in your server environment then reports information to our technical team in 15min increments. It offers many advantages compared with conventional reporting.

Conventional Server Health Checks

- ✗ They're reactive - reporting is often up to 30 days behind
- ✗ They're labour intensive in terms of reviewing and reporting
- ✗ They only tell you what's OK, instead of what needs to be done

Proactive Server Monitoring Model

- ✓ Offers real-time monitoring of servers every 5-15 minutes
- ✓ Gives you weekly snapshot reports of key areas including anti-virus, backup, drive space, exchange and disk health
- ✓ Provides monthly reporting of historical data
- ✓ Includes Level 1 Technical Support (investigating and resolving initial server issues such as backup failures)
- ✓ Monthly option of on-site technical support (additional charge)

Pricing

Rate description	Yearly rate
1 server	\$2,400.00
2 servers	\$3,600.00
3 servers	\$4,500.00
4 servers	\$5,100.00
5 servers	\$5,700.00
10 servers	\$8,700.00

Pricing excludes GST.
